Eka Systems Recognized as Influential Technology Provider *Company Lauded for Business-Model Execution and Market Leadership*

Germantown, MD, December 2, 2008 - Eka Systems, a global provider of Smart Grid solutions and Advanced Metering Infrastructure (AMI) for electric, gas and water utilities, today announced, that for the second year in a row, it has been selected to the *2009 M2M 100* list by M2M magazine.

About 325 companies were considered for the *2009 M2M 100* listing, but only 100 companies passed the rigorous selection process, which includes such criteria as customer references; business-model strength and execution; and market leadership.

“The M2M 100 is the most influential ranking of the companies that offer technology solutions within the global marketplace for machine-to-machine solutions”, said Prakash Chakravarthi, President and CEO of Eka Systems. “Being selected again means that the editors of M2M magazine and their editorial advisory board recognize Eka Systems as one of the most important and influential technology providers in the machine-to-machine market segment.”

Prakash added, “Since its inception, Eka Systems has been a pioneer in Utility Smart Networks and Smart Grid solutions. Eka’s commitment to customers is evident with the continuing expansion of our EkaNet™ solutions to enable global AMI and Distribution Automation solution deployments. The worldwide utility industry is becoming a recognized leader in M2M applications with a clear need for networking solutions to millions of devices.”

About Eka Systems

Eka Systems is a global manufacturer and supplier of wireless, self-managing, self-healing Smart Network and Smart Grid networking solutions that provide unrestricted monitoring and control of customer water, electric and gas data; enabling utility companies to create efficient, flexible and highly scalable AMI, AMR, and Distribution Automation solutions while simultaneously enhancing overall customer satisfaction.

Eka System’s portfolio features the EkaNet Smart Network which provides comprehensive security for a utility’s entire network and its data. EkaNet solutions scale easily, self-configure, and self-heal without burdensome installation and cost issues while managing themselves, thereby eliminating traditional IT management costs associated with smart metering.
